

Merubah Hostname Archlinux

jalankan perintah berikut : `nano /etc/hostname`

kemudian editor nano akan terbuka, rubah nama hostname dengan nama yang anda inginkan, tanpa spasi

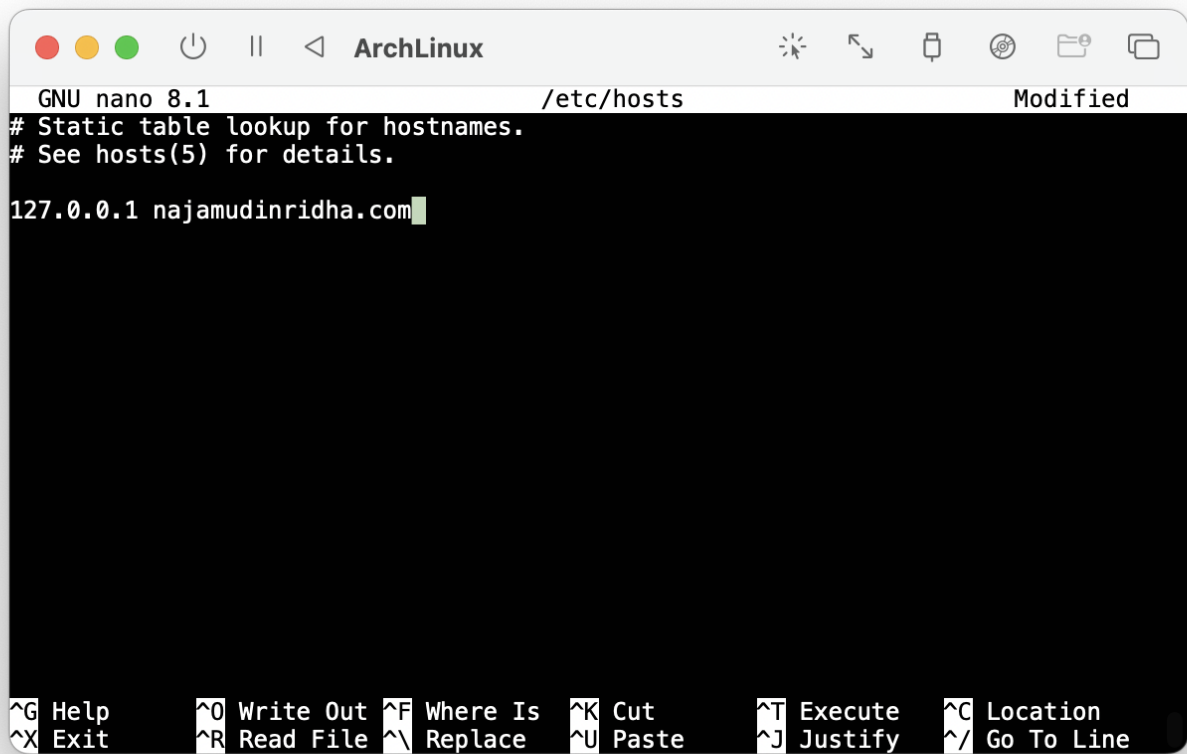

```
ArchLinux
GNU nano 8.1 /etc/hostname
najamudinridha.com

[root@alarm ~]#
```

kemudian keluar dengan perintah CTRL+X, tekan Y untuk simpan

kemudian rubah file hosts dengan perintah nano /etc/hosts

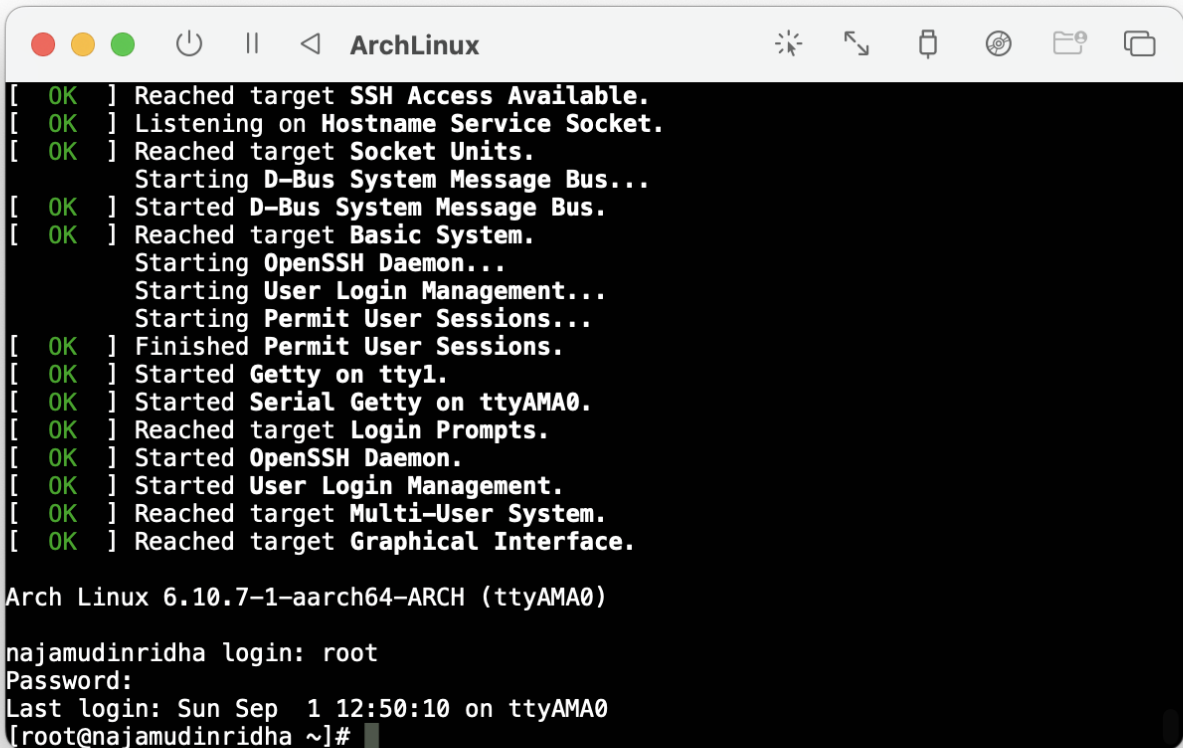

```
GNU nano 8.1 /etc/hosts Modified
# Static table lookup for hostnames.
# See hosts(5) for details.

127.0.0.1 najamudinridha.com

^G Help      ^O Write Out  ^F Where Is   ^K Cut        ^T Execute    ^C Location
^X Exit      ^R Read File  ^\ Replace    ^U Paste      ^J Justify    ^_ Go To Line
```

ganti nama komputer sebelumnya dengan yang baru, CTRL+X dan Y, kemudian restart komputer

A terminal window titled "ArchLinux" with standard window controls (red, yellow, green buttons, power, pause, back arrow) and system icons (brightness, network, volume, power, window management). The terminal output shows the system booting through various targets: SSH Access Available, Hostname Service Socket, Socket Units, D-Bus System Message Bus, Basic System, OpenSSH Daemon, User Login Management, Permit User Sessions, Getty on tty1, Serial Getty on ttyAMA0, Login Prompts, and finally Multi-User System and Graphical Interface. The prompt is "Arch Linux 6.10.7-1-aarch64-ARCH (ttyAMA0)". A user named "najamudinridha" logs in as "root", enters a password, and the system shows the last login as "Sun Sep 1 12:50:10 on ttyAMA0". The prompt is "[root@najamudinridha ~]#".

```
[ OK ] Reached target SSH Access Available.
[ OK ] Listening on Hostname Service Socket.
[ OK ] Reached target Socket Units.
       Starting D-Bus System Message Bus...
[ OK ] Started D-Bus System Message Bus.
[ OK ] Reached target Basic System.
       Starting OpenSSH Daemon...
       Starting User Login Management...
       Starting Permit User Sessions...
[ OK ] Finished Permit User Sessions.
[ OK ] Started Getty on tty1.
[ OK ] Started Serial Getty on ttyAMA0.
[ OK ] Reached target Login Prompts.
[ OK ] Started OpenSSH Daemon.
[ OK ] Started User Login Management.
[ OK ] Reached target Multi-User System.
[ OK ] Reached target Graphical Interface.

Arch Linux 6.10.7-1-aarch64-ARCH (ttyAMA0)

najamudinridha login: root
Password:
Last login: Sun Sep  1 12:50:10 on ttyAMA0
[root@najamudinridha ~]#
```

pastikan hostname telah berubah
